Practical workmanship backed by compliant delivery. Enervia undertakes electrical upgrades and energy installations with careful equipment placement, clear identification, site protection and a clean finish.

Switchboard assessment

Existing installations assessed for practical upgrade and compliance requirements.

Distribution upgrades

Protected circuits, alternative supply integration and clear circuit identification.

Battery storage systems

Structured equipment layout with inverter, batteries, barriers and safety signage.

Capabilities demonstrated

- Switchboard replacements and distribution upgrades
- Battery and hybrid inverter installations
- Backup circuits and alternative supply integration
- Protection, isolation, labelling and segregation
- Equipment barriers and site safety controls
- Testing, commissioning and completion records

Project delivery

From initial assessment through installation and handover, Enervia coordinates access, confirms site requirements, completes the work safely and provides the required electrical documentation.

Our story

Enervia is built around energy, connection and opportunity. The flowing pathways in our brand pattern represent power moving between homes, businesses and communities. The meeting points reflect the people and partnerships behind every project, while the open pathways represent growth and new opportunities. As a 100% Aboriginal-owned business, our goal is to deliver dependable work, build lasting relationships and create a business our team and community can be proud of.

Artwork note: The background pattern is an original Enervia brand concept and is not presented as traditional or artist-commissioned Aboriginal artwork.

Built for reliable delivery

Electrical, energy and maintenance capability across South East Queensland and Northern NSW.
